MongoDB, PostgreSQL, Supabase, SQL Server, MySQL, Firebase

tools
Git, Docker, Postman, Jira, Jenkins, Resend

ai
Atlas Vector Search, LangChain, OpenAI API, RAG, AI-assisted development

> education

B.S. Computer Science
New York Institute of Technology
2017 – 2021

Web Development Bootcamp
Ironhack Amsterdam · 400 hours
2019

Josh Comeau Courses
Joy of React · CSS for JS Developers · Whimsical Animations
2023 – present

> certifications

MongoDB Certified Developer
MongoDB
2024

AWS Certified Cloud Practitioner
Amazon Web Services
2026

> about

I taught my first coding class at 17 and have been teaching ever since: tutoring CS students at NYIT, then running webinars for 200+ developers and internal enablement sessions at MongoDB. I'm also a working fullstack developer and a bootcamp graduate myself, so I know both how real code gets built and what it's like to learn it fast.

> experience

Freelance Web Developer · ioav.dev
04/2026 – Present

- Built livceramic.com, an e-commerce and workshop booking site for a ceramics business, with Next.js, Supabase, Tailwind, and Resend.
- Built an admin dashboard so the non-technical owner can manage workshops, products, the gallery, and newsletter campaigns herself.

Solutions Architect · MongoDB
07/2024 – 03/2026

- Delivered regular technical webinars to audiences of 200+, breaking down complex database concepts through live demos and real-world use cases.
- Created and delivered internal enablement sessions for the Solutions Architect team on competitor technologies such as Pinecone and Snowflake.
- Co-built an internal tool used by the global SA team to auto-generate customer-ready slide decks on database health from cluster metrics.
- Designed and coded custom demo apps showing enterprise customers how MongoDB could solve their specific problems.
- Partnered with DBAs, developers, and executives to design scalable solutions on MongoDB Atlas.

Software Engineer (.NET / C#) · Itlize Global
07/2021 – 02/2023

- Developed fullstack web applications with ASP.NET and React alongside cross-functional teams.
- Implemented CI/CD pipelines with Jenkins for a leading credit bureau, cutting deployment time.
- Refactored stored procedures and improved SEO for a major e-commerce platform.

Academic Tutor, Computer Science · NYIT
01/2018 – 01/2020

- Led one-on-one sessions in Programming, Data Structures, Discrete Structures, and Calculus, adapting to each student's learning style.

IT Class Instructor · AIS Costa Rica
09/2016 – 02/2017

- Planned and taught computer literacy and intro HTML & CSS to children ages 7–13, with hands-on activities.
